Welcome to our May update

- Progress continues on the Adam Smith Business School, notably with the mechanical and electrical systems.
- Solar panels are being installed on the roof and are approximately 90% complete and lighting is complete from levels 2-6.
- Internal heating is planned for the end of the month.
- Thank you to all who attended the community engagement event at the new Clarice Pears building.
- The event provided an update on the activities of the Campus Development, as well as looking ahead to future plans.
- Please get in touch if you would like more information on the updates that were discussed.

Solar panels and internal glazing

Site Progress (cont.)

On the Adam Smith Business School:

- Landscaping works are continuing around the building, progressing well on the North and South elevations.
- Commissioning and room inspections have commenced as the building moves into the latter stages of the project.
- The project reached an important milestone with the removal of the two tower cranes that have been erected since mid-2021.

Project Look Ahead

- The Adam Smith Business School façade is nearly fully installed, with the site team looking to make significant progress with the internal fit out over the coming weeks.
- Testing and commissioning will continue throughout all levels.

Community Update

- Earlier this month we supported the ConStructEd Scotland programme in partnership with the University of Glasgow.
- The Civil Engineering Students were based on site for the week and were tasked with real-life construction projects.
- This is a fantastic opportunity for students to turn theory into practice.
- We were supported during the week from our supply chain partners Interlocked.
- Multiplex also hosted our annual five-a-side football tournament.
- It was a great evening with some healthy competition on show.
- We raised over £1,000 in aid of Simon Community Scotland. A Glasgow-based charity aimed at tackling homelessness.

Environmental Update

- The Campus Development project came 3rd in the Multiplex-wide biodiversity competition.
- Our sustainability team delivered a toolbox talk to our staff discussing the importance of biodiversity and how the built environment has an important role to play in supporting natural systems.
