Headlines in brief

- Introduction
- Site progress
- Look ahead
- Community update
- Environmental update
- Site working hours
- Who to contact

Introduction

Welcome to the latest edition of the University of Glasgow Campus Development newsletter.

This newsletter is issued by the university's appointed project delivery partner, Multiplex, for and on behalf of the Campus Development team. Each newsletter will provide an update from the project including the latest site works as well as a look ahead at planned activities.

The University of Glasgow is currently undertaking a £1 billion Campus Development programme, which includes the redevelopment of the 14-acre former Western Infirmary site, building a mix of modern research, teaching and public spaces.

The new campus will create a rich mix of community, public engagement and social spaces and enhance engagement between the University and the city.

Constructing a better future

Site Progress

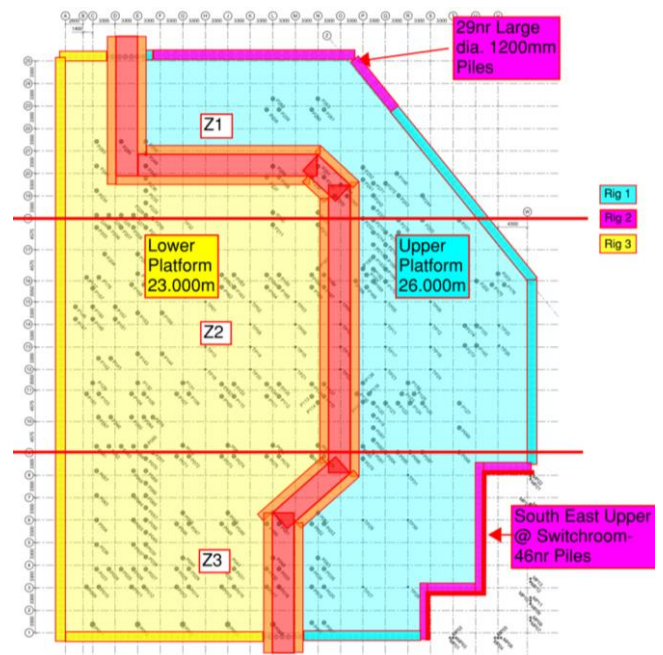

- A planning application for the main Keystone development was submitted for approval at the end of June
- The first building warrant application, a legal permission to commence building works, was made at the end of July
- The rain gardens are now fully closed off to the public, with temporary heras fencing in place prior to the installation of hoarding
- Pile mat works have continued to progress

Preparation of the plot including pile mat

Look Ahead

- HV switchroom works will progress this month, including the removal of cladding to facilitate future works and amendments to the earthing
- Site hoarding will be installed along St Mungo Square and around plot B
- Procurement remains ongoing for a large number of work packages following the release of further design information

Outline strategy for Keystone early works

View of the enabling works from the project office
